

Mr. Jim Kelley  
Warm Bros. Construction Co.  
2335 Florence Avenue  
Cincinnati, Ohio 45206

Dear Jim,

In the practice of architecture we have the opportunity to work with many construction companies both large and small on projects of all sizes.

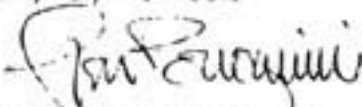

Most of the contractors awarded our projects have proven to be competent and exhibited the qualities necessary for the successful completion and occupancy of the structures.

This leads us to the purpose of our writing this letter. As mentioned above we have been involved with numerous contractors but few have risen to the competency level consistently displayed by your organization. The latest two projects; The Federal Court System in Reading, Pennsylvania, and Colonies North Shopping Center in San Antonio, Texas which you were the prime Contractor were completed on time and within budget in spite of a condensed schedule. Your diligence to complete the projects, quality and experience of your personal and workmanlike methods have made these two projects very successful.

As architects, our business and reputation is enhanced by General Contractors we recommend and feel can accomplish a project within time and budgetary constraints presented to them. From this standpoint, we would recommend your firm to any client who needs a contractor who meets or exceeds his expectations for a "first class" facility.

Jim, we wish to thank you for your willingness and abilities to work closely with us through the construction process and hope we may team up again on future projects.

Sincerely,  
KBA, Inc./Architects

Leonard J. Bonomini, RA  
President
